

ACORN WOODSHACK

Acorn is a social enterprise which provides work experience and training to people with a disability or long term health condition.

The aim is to reuse as much of the timber waste we receive as possible, and in doing so reduce the impact on our environment and provide work experience and training opportunities to all clients of the Jersey Employment Trust.

We are working closely with the Growth, Housing & Environment Department to reduce as much timber waste as possible, and we have a timber reuse skip on site at the Energy Recovery Facility for you to be able to use for timber reuse.

PLEASE SEE REVERSE OF THIS FLYER FOR LIST OF WASTE TIMBER REQUIRED.
